GENERAL QUESTIONS								
The practice has a good understanding of how the EHR system works.								
Overall, the EHR system meets the practice's needs.								
The EHR system is easy to navigate between modules.								
REPORTING REQUIREMENTS								
The EHR system's reporting capabilities meet the practice needs.								
Customized reports are easily generated.								
ADMINSTRATIVE								
Patient information is easily accessible (test results, problem list, meds, etc.).								
Remote access to the EHR system to access patient information is timely and without issues.								
The use of the EHR system has improved the efficiency of the physicians and midlevel providers.								
The use of the EHR system has improved the efficiency of the nursing and MA staff.								

	Strongly Agree	Agree	Unsure	Disagree	Strongly Disagree	N/A	Comments
The use of the EHR system has improved the efficiency of the office staff.							
The use of the EHR system has allowed the practice to see more patients.							
The clinical note creation options have aided the physician to comprehensively document patient encounters.							
The EHR system has improved the practice's clinical decision-making and documentation process.							
Digital voice recognition has helped decrease the need for dictation. (if applicable)							
The graphing functions have aided the physician with communicating results/ outcomes and with providing patient education.							
The integration of other diagnostic tools with the EHR has aided the physician with patient care management.							
The practice uses the care management module to notify patients who are overdue for appointments.							
The practice uses the care management module to remind patients about needed tests, studies and other services/immunizations.							
The practice uses the care management module to generate lists of patients requiring intervention.							

	Strongly Agree	Agree	Unsure	Disagree	Strongly Disagree	N/A	Comments
The practice utilizes the care management module to generate patient education materials to help patients understand their condition(s).							
E-PRESCRIBE							
The practice uses the e-Prescribing function that prompts generic or less expensive brand alternatives at the time of prescription entry.							
The practice uses the e-Prescribing function to reference drug formularies of the patient's health plan/pharmacy benefit manager and to recommend preferred drugs at time of prescription entry.							
The practice uses the e-Prescribing function to offer guidelines and evidence-based recommendations based on medication prescribed to a patient.							
The practice uses the e-Prescribing function to calculate the appropriate dose and frequency based on patient parameters such as age and weight.							
The practice uses the e-Prescribing function to maintain a list of each patient's current medications.							
LABORATORY SERVICES							
The practice generates laboratory requisitions electronically without issues.							

	Strongly Agree	Agree	Unsure	Disagree	Strongly Disagree	N/A	Comments
The practice receives laboratory results electronically without issues.							
Lab results automatically populate patient flow sheets.							
CODING FUNCTIONS							
The physicians utilize the coding assistance functions within the EHR system to select appropriate E&M codes.							
The system has improved the practice's coding and documentation processes.
